Installation notes:

Water pipes need to be thoroughly rinsed prior to installation. Be sure to mount and test each faucet in line with the valid specifications. We are not liable for any damages caused by improper installation.

Specifications:

Operating pressure range	0,05 MPa min. / 1,0 MPa max.
Operating pressure range recommended	0,2-0,3 MPa
Test pressure.....	1,6 MPa
Hot water temperature	80°C max.
Hot water temperature recommended	60°C
Flow rate at 0,3 MPa	
VB10169C	13,6 l/min
VB10170C	13,3 l/min

If flow pressure exceeds 0,5 MPa, a pressure reducing valve must be installed.

We reserve the right to make structural changes.

Installationshinweise:

Wasserrohre müssen vor der Montage gründlich ausgespült werden. Jede Armatur ist entsprechend der gültigen Normen zu montieren und zu prüfen. Für Schäden, die durch unsachgemäße Installation verursacht wurden, übernehmen wir keine Garantie.

Technische Daten:

Betriebsdruckbereich.....	min. 0,05 MPa / max. 1,0 MPa
Betriebsdruckbereich empfohlen	0,2-0,3 MPa
Prüfdruck.....	1,6 MPa
Heißwassertemperatur.....	max. 80°C
Heißwassertemperatur empfohlen	60°C
Durchflussgeschwindigkeit bei 0,3 MPa	
VB10169C	13,6 l/min
VB10170C	13,3 l/min

Wird der dynamische Druck von 0,5 MPa überschritten muss ein Druckminderventil eingebaut werden. Konstruktionsbedingete Änderungen bleiben vorbehalten.

Notes d'installation:

Avant l'installation, les tuyaux d'eau doivent être bien rincés. Chaque robinet doit être monté et contrôlé conformément aux normes en vigueur. Nous déclinons toute responsabilité quant aux dommages dûs au non-respect des instructions de montage.

Spécifications:

Plage de pression de fonctionnement	0,05 MPa min. / 1,0 MPa max.
Plage de pression de fonctionnement recommandé.....	0,2-0,3 MPa
Pression de test.....	1,6 MPa
Température de l'eau chaude.....	80°C max.
Température de l'eau chaude recommandé	60°C
Débit à 0,3 MPa	
VB10169C	13,6 l/min
VB10170C	13,3 l/min

Si la pression du débit dépasse 0,5 MPa, un réducteur de pression doit être installé.

Sous réserve de modifications dues à la construction.

Note di installazione:

Prima del montaggio, le tubature dell'acqua devono essere risciacquate con cura. Tutti i componenti della rubinetteria vanno montati e testati in conformità alle norme vigenti. Non ci assumiamo alcuna garanzia per danni causati da un'installazione non correttamente eseguita.

Pressione di funzionamento:

Pressione di funzionamento min. 0,05 MPa / max. 1,0 MPa

Pressione consigliata 0,2-0,3 MPa

Pressione di prova 1,6 MPa

Temperatura dell'acqua calda max. 80°C

Temperatura consigliata 60°C

Portata con pressione di 0,3 MPa

VB10169C 13,6 l/min

VB10170C 13,3 l/min

Se la pressione di erogazione è superiore a 0,5 MPa, è necessario installare una valvola riduttrice di pressione.

Con riserva di modifiche costruttive.

Русский – указания по сборке:

Перед проведением монтажа следует тщательно промыть водопроводные трубы. Каждый смеситель следует устанавливать и контролировать в соответствии с действующими нормами. Мы не несем ответственность за ущерб и повреждения, возникшие в результате ненадлежащей установки оборудования.

Технические данные:

Диапазон рабочего давления мин. 0,05 МПа / макс. 1,0 МПа

Рекомендуемый диапазон рабочего давления 0,2-0,3 МПа

Контрольное давление 1,6 МПа

Температура горячей воды макс. 80 °С

Рекомендуемая температура горячей воды 60 °С

Скорость потока воды при 0,3 МПа

VB10169C 13,6 л/мин

VB10170C 13,3 л/мин

При превышении динамического давления величиной 0,5 МПа следует обязательно установить редуцирующий клапан.

Мы сохраняем за собой право на конструкционные изменения.
